Marina Munkhoeva

marina.munkhoeva@skoltech.ru
maremun.github.io

RESEARCH INTERESTS	Flow-based generative modelling, fast kernel methods, natural language processing

PUBLICATIONS

M. Munkhoeva, Y. Kapushev, E. Burnaev and I. Oseledets,
Quadrature-based features for kernel approximation (Spotlight)
Neural Information Processing Systems (NeurIPS 2018).
arxiv.org/abs/1802.03832, code: github.com/maremun/quffka

A.Tsitsulin, **M. Munkhoeva**, D. Mottin, P. Karras, I. Oseledets, L. Kamma and E. Müller
Anytime Optimal Graph Embeddings (In submission)

EDUCATION

Skolkovo Institute of Science and Technology (Skoltech)
Ph.D. student, Computer Science (expected October 2020)
Advisor: Ivan Oseledets
Thesis (working title): Distribution Learning

Skolkovo Institute of Science and Technology (Skoltech)
M.Sc. in Computational Mathematics, June 2016
Advisor: Ivan Oseledets
Thesis: Using deep neural networks for machine translation with non-parallel corpora

Massachusetts Institute of Technology (MIT)
Visiting student, Fall 2015
Coursework: Algorithms for Inference,
Advanced Natural Language Processing,
Statistical Learning Theory and Applications

National Research University Higher School of Economics (NRU HSE)
Bachelor Degree, June 2014, GPA 4.9/5, magna cum laude (top 3%)

SUMMER SCHOOLS

Summer School on Deep Learning and Bayesian Methods
26-30 August 2017, Moscow, Russia

EXPERIENCE

Research Assistant, Skoltech, Sep 2016 – present
Projects in neural network optimization, implicit generative models for physical processes, variational autoencoders, kernel approximation as neural layers

TEACHING EXPERIENCE

Teaching Assistant	Numerical Linear Algebra	Fall 2018, 2017, 2016
Instructor	Reproducible Research with Docker	Jan 2018, 2019
Instructor	Mathematical and technical writing in English	Jan 2017

RELEVANT SKILLS

Programming	Python, PyTorch, Tensorflow
Machine Learning	Deep Learning, Generative models (flows, GANs, VAEs), Kernels
Miscellaneous	LaTeX, Git, Docker, Linux, cluster administration, SQL

OTHER

Server administration, I support and maintain our laboratory's computational resources.
NLA bot, developed a Telegram bot for home assignment submission, testing and auto-grading.
github.com/maremun/nlabot

AWARDS

Fall 2018	NeurIPS Travel Grant
Spring 2014	NRU HSE Scholarship (for best academic performance)
